## Practical solution to the big problem BassÇek® Minimum contact, maximum hygiene!

In the office, bathroom, WC and many other public spaces, the surfaces that everyone touches are the most suitable environments for the spread of viruses.

Do not pay high prices to make your doors hygienic.

BassÇek is a simple, inexpensive and practical solution for this big problem.

It is easy to set up and applies to the desired door in just 5 minutes. You can start using it immediately.

BassÇek® offers a cost-effective and effective way to your customers, employees, and visitors, while they leave a non-sterile space, such as a bathroom. It provides a germ-free option to them. It also enables hands free access to areas where a door pull is a necessity.

Simply step and pull. Everything is that easy!

BassÇek® Foot Handle is a unique yet simple apparatus that allows you to open a hands-free door using your foot or a cane.

It is screwed under the door and is in the form of a metal plate with a serrated section that allows a person to step on and pull the door.

It is environmentally friendly, made of recycled galvanized steel and painted electrostatic, designed to last a lifetime.

Simply put, the BassÇek® Foot handle:

- Prevents bacteria and virus transport
- It is low cost.
- It is easy to apply.
- It does not require maintenance.
- It is environmentally friendly.
